

Andrew Martinelli

amartinelli@smcm.edu - www.linkedin.com/in/andrew-martinelli - <https://github.com/AMartinelli1>

SUMMARY:

Motivated computer science student with a strong foundation in programming, data management, and software development gained through coursework and hands-on project experience. Proven ability to **manage workloads, collaborate effectively within teams and groups, and approach problems logically**. Eager to apply technical skills and problem-solving abilities in software development or related technical roles, while **continuing to grow and contribute** to innovative projects.

EDUCATION/HONORS

St. Mary's College of Maryland

Saint Mary's City, MD

Major: BS in Computer Science; Minor in Economics

May 2026

- NCAA Men's Soccer Varsity Athlete
- Dean's List

Wheaton High School

Silver Spring, MD

High School Diploma;

May 2022

- STEM Academy | AP Coursework | National Honors Society
- Varsity Soccer Captain

EXPERIENCE:

Experience:

Operations and Network Internship | Office of Information Technology SMCM

January 2025-May 2025

- Delivered campus-wide IT support through a centralized ticketing system, troubleshooting network outages, device connectivity issues, login failures, and hardware problems for students, faculty, and staff.
- Assisted with network and systems operations by supporting servers, switches, routers, and wireless access points, while participating in on-site troubleshooting across academic and administrative buildings.
- Supported identity and access management and IT asset operations, including MFA setup, password resets, VPN access, account permissions, secure ID card issuance, and endpoint deployment with proper security and labeling procedures.

Software Start Up | SMCM

August 2024-May 2025

- Collaborated with local nonprofit and campus clients to support the development, testing, and deployment of Django-based web applications, ensuring alignment with defined business requirements and user expectations.
- Served on a QA-focused team alongside R&D, designing and executing manual test cases, creating structured QA documentation (Excel), and validating functionality across Google Cloud-hosted production environments.
- Reviewed and tested existing codebases (Python, Java, HTML), identified and documented defects, and verified live-site readiness prior to public launch to support long-term maintainability and future development teams

Camp Instructor | Maryland Soccer Association | Summer Seasonal

July 2021-August 2024

- Coached children ages 4-14, developing **leadership, communication, and problem-solving** skills by tailoring instruction to individual needs.
- Collaborated with team members to create a structured, engaging environment, emphasizing teamwork and adaptability in managing **diverse groups**.
- Certified in CPR, AED, and First Aid, demonstrating strong attention to **safety and responsibility**.

Volunteer Community Work | Self Employed

August 2018-Present

- Built long-term customer relationships through **reliability, clear communication, and accountability** while independently handling time management and service quality.
- Demonstrated **trust, responsibility, and safety awareness** while providing in and out of home services, including childcare, lawn/house maintenance.

PROJECTS:

AdaptAMap - Backend Development (Henhacks 2026 Project)

Java, Maven, Springboot, Snowflake API

- Developed core backend logic in Java using Spring Boot and Maven, integrating external APIs and Snowflake to build a functional prototype of an accessibility-focused mapping platform.
- Implemented foundational components of an internal alert and support system to surface accessible infrastructure data, contributing to partial frontend-backend integration within project time constraints.
- Collaborated in a small team using Git and VS Code to design and present a scalable solution roadmap, outlining future enhancements such as multilingual support, expanded filtering, and advanced accessibility features.

Personal Portfolio Website

Flask, Python, HTML, CSS, JavaScript

- Built a responsive multi-page web application with server-side rendering
- Implemented dynamic UI interactions and modular styling
- Applied AI-assisted development to streamline debugging and iteration

Java Educational Graphics Library

Java

- Designing and implementing a custom Java library that abstracts the Swing API to simplify 2D graphics rendering for introductory CS students
- Encapsulating complex GUI components into reusable, beginner-friendly classes and methods
- Applying object-oriented principles (abstraction, encapsulation, modular design) to improve usability and reduce API complexity

RELEVANT COLLEGE COURSEWORK:

Fall '22

- CS 120 (Computer Science 1) : Career and Network Navigation : Microeconomics

Spring '23

- CS 130 (Computer Science 2) : Macroeconomics : Discrete Mathematics

Fall '23

- CS 201 (Data Structures & Algorithms) : CS 230 (Computer Architecture) : Intermediate Macroeconomics : Core - Keys to Project Management Success

Spring '24

- CS 251 (Programming Languages) : Calc 1 : Graph Theory : Natural Resource Economics

Fall '24

- Calc 2 : CS 350 (Acceleration) : CS 401 (Software Startup) : Theory of Computation

Spring '25

- CS 480 (Digital Forensics) : CS 401 (Software Startup) : History (Historical Methods and Skills) : Art - Visualization

Fall '26

- CS 450 (Database Management) : Econ 372 (Economics in Developing Countries) : Business Intelligence Analysis and Visualization
