SUMMARY

Motivated computer science student with a strong foundation in programming, data management, and software development gained through coursework and hands-on project experience. Proven ability to **manage workloads, collaborate effectively within teams and groups, and approach problems logically**. Eager to apply technical skills and problem-solving abilities in software development or related technical roles, while **continuing to grow and contribute** to innovative projects.

EDUCATION/HONORS

St. Mary's College of Maryland

Saint Mary's City, MD

Major: BS in Computer Science; Minor in Economics

May 2026

- NCAA Men's Soccer Varsity Athlete
- Dean's List
- Office of Information Technology Intern

Wheaton High School

Silver Spring, MD

High School Diploma;

May 2022

- STEM Academy | AP Coursework | National Honors Society
- Varsity Soccer Captain

EXPERIENCE | PROJECTS

Experience:

Operations and Network Internship | Office of Information Technology SMCM

January 2025-May 2025

- Provided **campus-wide IT support** through a centralized ticketing system, troubleshooting network outages, device connectivity issues, user login failures, and hardware-related problems for students, faculty, and staff.
- Assisted with **network and systems operations**, including inspecting and supporting servers, switches, routers, and wireless access points, and participating in on-site troubleshooting across academic and administrative buildings.
- Supported **identity and access management** by assisting with multi-factor authentication (MFA), password resets, account permissions, VPN access, and secure issuance of student ID cards in accordance with campus security policies.
- Managed and **organized IT assets and endpoint devices**, ensuring proper labeling, functionality, and deployment while assisting with hardware setup and endpoint security measures.

Software Start Up | SMCM

August 2024-May 2025

- Collaborated with **local nonprofit and campus clients** to support the development and deployment of **Django-based web applications**, ensuring solutions met defined business requirements and user expectations.
- Worked within a QA-focused team alongside an R&D group, becoming familiar with **Google Cloud, Django, Git**, and web application workflows to effectively test and validate production environments.
- Reviewed and validated **existing codebases (Python, Java, HTML)**, ensuring applications were functional, up to date, and properly documented to support long-term maintainability for future development teams.
- Designed and executed **manual test cases** to evaluate website functionality, identify defects, and report issues to the R&D team using structured QA documentation.
- Created **testing checklists and QA documentation** (Excel-based test matrices) to guide future classes in regression testing and ongoing application validation.
- Supported the **public launch of client websites**, verifying live functionality, usability, and client readiness prior to handoff.

Camp Instructor | Maryland Soccer Association | Summer Seasonal

July 2021-August 2024

- Coached children ages 4-14, developing **leadership, communication, and problem-solving** skills by tailoring instruction to individual needs.
- Collaborated with team members to create a structured, engaging environment, emphasizing teamwork and adaptability in managing **diverse groups**.
- Certified in CPR, AED, and First Aid, demonstrating strong attention to **safety and responsibility**.

Volunteer Community Work | Self Employed

August 2018-Present

- Managed **client-facing service operations**, scheduling recurring work, following detailed requirements, and delivering consistent results for multiple households.
- Built long-term customer relationships through **reliability, clear communication, and accountability** while

- independently handling time management and service quality.
- Demonstrated **trust, responsibility, and safety awareness** while providing in-home services, including childcare, in family environments.

Projects:

Web Application Development (QA Role)

Python, Django, Google Cloud, Git

- Supported testing and validation of Django-based web applications by designing manual test cases and documenting defects to improve reliability prior to launch.
- Reviewed existing Python, Java, and HTML codebases to ensure functionality, consistency, and long-term maintainability.
- Assisted in version control workflows using Git and validated production deployments in a cloud environment to support successful public releases.

Personal Portfolio Website

Flask, Python, HTML, CSS, JavaScript

- Built a responsive multi-page web application with server-side rendering
- Implemented dynamic UI interactions and modular styling
- Applied AI-assisted development to streamline debugging and iteration

Java Educational Graphics Library

Java

- Designing and implementing a custom Java library that abstracts the Swing API to simplify 2D graphics rendering for introductory CS students
- Encapsulating complex GUI components into reusable, beginner-friendly classes and methods
- Applying object-oriented principles (abstraction, encapsulation, modular design) to improve usability and reduce API complexity

RELEVANT SELECTED COLLEGE COURSEWORK

Fall '22

- CS 120 (Computer Science 1) : Career and Network Navigation : Microeconomics

Spring '23

- CS 130 (Computer Science 2) : Macroeconomics : Discrete Mathematics

Fall '23

- CS 201 (Data Structures & Algorithms) : CS 230 (Computer Architecture) : Intermediate Macroeconomics : Core - Keys to Project Management Success

Spring '24

- CS 251 (Programming Languages) : Calc 1 : Graph Theory : Natural Resource Economics

Fall '24

- Calc 2 : CS 350 (Acceleration) : CS 401 (Software Startup) : Theory of Computation

Spring '25

- CS 480 (Digital Forensics) : CS 401 (Software Startup) : History (Historical Methods and Skills) : Art - Visualization

Fall '26

- CS 450 (Database Management) : Econ 372 (Economics in Developing Countries) : Business Intelligence Analysis and Visualization
